

The Turnitin Difference:

the largest and fastest growing database

The breadth and depth of Turnitin's content databases provide an unparalleled repository of 99.3 billion current and archived web pages, 1.8 billion student papers, and best-in-class scholarly content from top publishers in every major discipline and in dozens of languages. The ever-growing database ensures the most comprehensive collection of content for similarity checking and plagiarism deterrence for students, researchers, or publishers.

Turnitin has three primary databases. Each one can be used to help identify different types of plagiarism.

Global student papers database

USE TO:

Discourage student collusion, the most common form of plagiarism, when comparing against 15 years' worth of student papers.

1.8 student papers

Turnitin content is trusted and used exclusively by top publishers

Through our trusted relationship with Crossref, 1500 publishers in their network use iThenticate as a fundamental part of the manuscript screening and review process. Publishers rely on Turnitin's expansive content database to surface any potential plagiarism issues prior to publication, protecting the journal's and researcher's reputation.
